Disease: Potato - Early blight
Confidence: 88.60%
Date: 19-02-2026 14:23:14

Cause of Disease:

Potato Early Blight is caused by the fungus *Alternaria solani*. The disease develops in plants under stress conditions such as lack of nutrients or improper irrigation. It spreads through wind, rain splash and infected plant debris present in soil. Warm and moist environmental conditions accelerate its growth rapidly.
